**Why I decided to go to Grand Council:** I wanted to connect with Brothers from other chapters and get away from the "bubble" of Alpha Iota. Furthermore, I want to see the differences between the chapters and use what I learn from them to help Alpha Iota grow.

**What I learned most from my experience with PDC:** I used to be someone who would only stay in her bubble and never leave it. Through PDC, I learned that I can not only connect with people who are very unlike me but also want to connect with them and have fun doing so! ☺

**What I learned as social co-chair:** I learned patience and how to manage both people and time.

**What direction I would like to take Alpha Iota as WMA:** I would like to make Alpha Iota the golden standard of PDC chapters by initiating active, passionate brothers that are the cream of the pharmacy crop!

**Favorite aspect of PDC:** I really enjoyed the professional aspect of PDC. I liked doing the food bank that PDC does each year, bingo night and adopt a highway. I loved it when the fraternity came together to do something for the community.

**Why I rushed PDC:** I did my undergraduate degree in Biology at UGA and loved my undergraduate sorority. I looked at the various fraternities which were available and knew that PDC was the fraternity that I wanted to be involved in.

**What type of environment I think PDC should have:** I believe that PDC should foster an environment where Brothers feel like true Brothers. The relationship part of PDC is extremely important. It should be an environment where Brothers want to come back and feel comfortable.

**What I learned as WMA:** I learned to stick to my guns and be as organized as possible. Being WMA and a Brother of PDC also made me a stronger leader. Even if I couldn't make everyone happy I learned to listen to people and work with them if it was possible.
